

Cylindrical Type (PM/PXM Series)

- Epoxy resin fillings ,strong shock resistance
- The smallest diameter(8mm) in the industry
- Nickel plated brass, effectively resist chemicals' corrosion

XP.C-07

Square Type(PTE/PTV/PTN/PTZ/PTJ-I Series)

- Traditional square, enjoy great performance
- 25.4mm standard hole pitch with simple installation
- Identify the action clearly with dual LED indicators

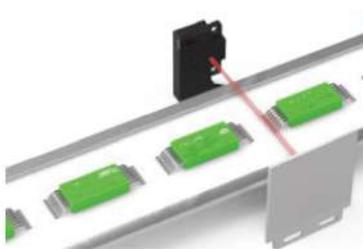

XP.C-14

Flat Type(MP2 Series)

- Sensing face on front surface and top surface (various ways of detection)
- Can switch L.on from D.on freely
- Long distance detection (up to 40mm) sensing distance (White cardboard)

XP.C-26

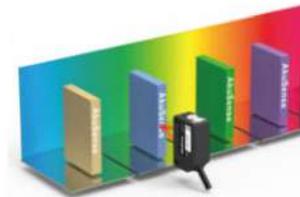

Thickness is only 3.5mm

Thin Type (ESL series)

- 3.5mm ultra-thin design, greatly saves installation space
- Ip67 Protection degree, excellent mechanical performance
- LED indicator is bright and can be clearly seen from the back

XP.C-28

Not affected by background color

BGS Type(ESB Series)

- Interference free from the color of detecting object and the background, stable detection
- Built-in rotational knobs, with many turns for fine-tuning of sensitivity adjustment
- IP67 protection degree, with excellent mechanical performance

XP.C-30

Transparent Object Detection(EST Series)

- No blind spot (detection for every corner)
- Suitable for moving objects
- Best options for different kinds of glass or plastics

XP.C-33

Reflectors

RGB Light Source

Color/Mark Detection(ESC Series)

- Built-in RGB light sources
- Accurate color detection,automatically switch to the corresponding sensing light source according to the color of target object
- Two detection modes,with mark mode and molor mode

XP.C-35

TOF Reflective (PM18-TF Series)

- 1.2m range can achieve 95% black and white difference
- Strong anti-interference, can reach 3000lux
- Ip67 high protection level

XP.C-11

IP69K High Protection Type (PM18K Series)

- AISI 316L stainless steel housing material
- Protection grade IP69K, excellent mechanical performance
- Can be used in harsh environments

XP.C-12

NEW!

Anti-glare Type(PTL Series)

- Not interfered by strong light, stable detection
- Built-in multi-turn potentiometer for fine adjustment of sensitivity
- Protection grade IP67, excellent mechanical performance

XP.C-17

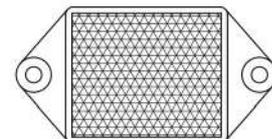

NEW!

IO-Link Type (PTZ-C Series)

- With IO-link function to accelerate industrial 4.0
- Identify the action clearly with dual LED indicators
- IP67 protection degree, with excellent mechanical performance

XP.C-22

Reflectors

- Made of special material (strong housing)
- Shapes as circular, square and combination etc
- Customization is available as request

XP.C-36
